

Axtria MarketingIQ™

Insights to Drive Impactful Marketing Decisions

Pharmaceutical companies struggle to leverage marketing strategies & tactics to optimally impact their commercial success due to lack of, or infrequent, and inadequate analytics. Important business strategic knowledge that affects the bottom line is lost when people leave an organization. Analytics within the same organization lives in silos creating disjointed, sub-optimal, and hard-to-scale decisions.

With continuous and sophisticated analytic insights drawn from MarketinglQ's predictive models, you can improve your brand performance and make marketing decisions beyond allocating budget for promotional channels. Axtria MarketinglQTM utilizes machine learning techniques and offers robust analytics abilities under one umbrella, empowering marketers to assess brand strategies freely, plan future budgets, run planning scenarios and optimize company-wide marketing operations.

Current Challenges in Marketing Analytics

- Missed opportunity for continuous, sophisticated analytics led decision-making
- Various channels and factors interact in a unique way within Life Sciences that contribute to the complexity of channel attribution
- Lack of robust, granular, healthcare ecosystem models due to limited industry and AI/ML expertise
 - Need to put the power of a data scientist in the hands of novice data analysts

Axtria MarketingIQ™

Axtria MarketingIQ™ is the next-generation commercial marketing analytics product for Life Sciences companies that enables superior brand performance through market attribution, delivering timely insights that drive effective planning, evaluation, and execution.

Axtria MarketingIQTM drives marketing impact based on decades of domain experience to expertly replace simpler intermittent analytics with continuous predictive smart analytics. It democratizes business analytics and provides sophisticated granular models with unmatched powerful compute in a collaborative environment that enables experts to focus on more complex bespoke problems.
